

**INSUB.** is a label, a netlabel and a concert organisation based in Geneva, CH.

It covers the fields of experimental, electroacoustic, and composed musics.

The Records section, started in 2013, takes the form of Pay Per Download only releases, accompanied by physical prints containing textes, scores, etc, thought has an echo, or a reminder, of the digitalised music.

The netlabel offers free download for every releases, but some are however available in classical physical format (cd, cdr, LP).

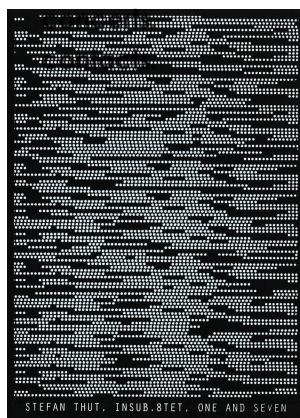

The concert happens here and there in Geneva, and the Insub Meta Orchestra is a very large ensemble of musicians from all Switzerland and beyond.

These activities have been developed since 2006, formerly under the « Insubordinations » name.
